

Listing of Claims:

This listing of claims reflects all claim amendments and replaces all prior versions, and listings, of claims in the application. Material to be inserted is in **bold and underline**, and material to be deleted is in ~~strikeout~~ and (if the deletion is of five or fewer consecutive characters or would be difficult to see) in double brackets [[]].

In brief, claims 2 and 5-8 have been canceled, claims 1, 3, 4, 9, and 12-14 have been amended, and new claims 31-33 have been added.

1. (Currently Amended) A set for bone fixation, comprising:

at least two bone plates, each bone plate **being configured to be secured to a left half or a right half of a skeleton and** including a distinct color that indicates a ~~distinct bone region~~ **the left half or the right half** to which the bone plate is configured to be secured.

2. (Canceled)

3. (Currently Amended) The set of claim 1 [[2]], further comprising at least one other bone plate configured for use on each of the left half and the right half of a skeleton, the at least one other bone plate including a color that is distinct from the distinct colors of the at least two bone plates.

4. (Currently Amended) The set of claim 1 [[2]], wherein the distinct color also indicates a particular bone region within one of the left half and the right half of the skeleton.

5-8. (Canceled)

9. (Currently Amended) The set of claim 1, wherein each **bone plate is configured to be secured to** ~~distinct bone region is included in one of~~ a distal region of a humerus bone **or** ~~[[and]]~~ a proximal region of an ulna bone.

10. (Original) The set of claim 1, wherein at least one of the bone plates includes at least one prong configured to engage bone when the bone plate is secured to bone.

11. (Original) The set of claim 1, wherein at least one of the bone plates has a first portion configured to be secured adjacent an end of a long bone and a second portion configured to be secured toward or on a shaft of the long bone, and wherein the first portion of the bone plate is thinner on average than the second portion of the bone plate.

12. (Currently Amended) The set of claim 1, wherein at least one of the bone plates includes a curved bone-facing surface configured to match the curved contour of ~~[[the]]~~ **a** distinct bone region to which the at least bone plate is configured to be secured.

13. (Currently Amended) The set of claim 1, further comprising instructions that relate each bone plate to the **left half or the right half** ~~distinct bone region~~ to which the bone plate is configured to be secured.

14. (Currently Amended) A method of bone fixation, comprising:
selecting a ~~distinct bone region~~ **a left half or a right half of a skeleton** for fixation;

selecting one of the at least two bone plates of claim 1 ~~according to the~~ **having a** distinct color ~~of the one bone plate that indicates~~ **corresponds to** the **selected left or right half** ~~distinct bone region~~; and

securing the one bone plate to the selected left or right half ~~distinct bone~~
region.

15-30. (Canceled)

31. (New) The set of claim 1, wherein the at least two bone plates include a pair of bone plates configured to be secured to corresponding bones in the left half and the right half.

32. (New) The set of claim 1, wherein the at least two bone plates include a pair of bone plates configured to be secured to noncorresponding bones of the left half and the right half.

33. (New) The set of claim 1, wherein the distinct color for the left half is blue, and wherein the distinct color for the right half is green.
